Catawba Valley Medical Center's Center for Rehabilitation is a full service, multidisciplinary program offering inpatient and outpatient therapies including physical and occupational therapy, speech therapy, psychological services, prosthetics/orthotics program for amputees and industrial medicine program. The comprehensive center includes a cardiopulmonary rehabilitation program as well as a fitness center with aquatics program and outdoor fitness trail. The 10-bed inpatient unit is certified by CARF, the Commission on Accreditation of Rehabilitation Facilities, as a Comprehensive Integrated Inpatient Rehabilitation program.

2019 OUTCOMES REPORT

COMPREHENSIVE INPATIENT REHABILITATION

Our Inpatient Rehabilitation Center helps individuals recovering from stroke, orthopedic surgery, amputation, or other illnesses and injuries maximize their recovery. Located within Catawba Valley Medical Center, our 10-bed unit has achieved a maximum three-year accreditation from the Commission on Accreditation of Rehabilitation Facilities (CARF). Our program and facility is designed to promote a high level of independence and patient comfort and safety.
